1	Programming Language	C++ (STL , Basic Knowledge of OOP) , Java(Basic Knowledge of OOP , JavaS-wing)
2	Programming Framework	None
3	Operating System	Basic knowledge of both Linux & Windows

ACADEMIC PROJECTS

MAZEBALL

2016

github.com/symonhasan/MazeBall

A simple C++ graphics game. The game has a ball at start position. The ball can move in four directions. The ball must move through the passage of a maze made by 2D bars. If the ball touches any parts of the maze the game ends at that point and player lose. If the player can reach the end point without touching any part of the maze then he win.

C++ WinBGIM Game

MAGICBOX

2017

github.com/symonhasan/MagicBox

A simple game implemented with javaSwing. The objective of this game is to put a number only once in a 3x3 matrix so that the sum value in every row , column & diagonal is equal to 15.

Java Swing Game

ONLINE BANK

2017

github.com/symonhasan/Online-Bank

This project is a general implementation of modern banking system using javaswing and jdbc. The client of the bank can login and make transactions through this application.

Java Swing

HOSPITAL MANAGEMENT

2018

github.com/symonhasan/Hospital-Managment

A typical hospital management system where the patient can give serial to their respective doctor. The doctor can see all those serial and can prescribe them. Also the doctor can access previous prescription as well. Apart from this there is a system where anyone can be a blood doner and can also search for doner of their desired blood group.

HTML CSS Bootstrap MySQL PHP

 github.com/symonhasan/Education-Portal

In this project I tried to implement a virtual classroom. Any signed in user can create class or enrolled in a class. A instructor can post feed in his classroom and the enrolled user of that classroom can see those post. Beside this every classroom has a forum where students along with instructor can help each other. In future I want to implement more features in it.
